

I would like to concur with the comments provided by AOPA and others, regarding the establishment of R-2204. As a small business owner that operates in this area, the impacts on operations would be detrimental to the nature of my business. I believe that notification via NOTAM or at the most an establishment of an Alert Area would provide the necessary safety concerns with this limited utilization of this airspace during IMC conditions. I fully support enhanced weather observations in this unique environment, along with the needs to facilitate the safe operation of aircraft that support the area. Thank You,
Oliktok Outfitters/ Jim Knopke
